PROFESSIONAL SUMMARY

AI Engineering student with 1+ years of hands-on experience in full-stack development, machine learning, and cloud deployment. Proficient in Python, FastAPI, Django, and AWS. Built 3+ production-ready applications serving 1,000+ users with 99.9% uptime. Passionate about building intelligent, scalable solutions and leveraging data for impactful results. Eager to contribute to innovative, AI-driven products and grow as a software engineer.

EDUCATION

G. H. Rasoni College of Engineering

Graduated 2026

B.Tech in Computer Science and Engineering (AI)

CGPA: 7.94

Anjuman Polytechnic

2023

Diploma in Computer Engineering (CS)

Percentage: 70.51%

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL

Backend: FastAPI, Django, Flask, REST APIs, Microservices

Machine Learning: Scikit-learn, Pandas, NumPy, Data Preprocessing, Model Training

Databases: MySQL, PostgreSQL, SQLAlchemy ORM, Django ORM

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Git/GitHub, CI/CD

Web: HTML, CSS, Bootstrap 5, Tailwind CSS, React, TypeScript

Soft Skills: Problem-Solving, Team Collaboration, Agile Development, Technical Communication

Concepts: Object-Oriented Programming, Authentication (JWT), API Development, Database Design, Data Structures

EXPERIENCE

Negals Technologies Pvt. Ltd.

June 2025 – Present

Software Developer Intern

- Architected scalable Django web applications serving 1,000+ daily users with 99.9% uptime; engineered FastAPI REST APIs reducing response time by 40% through query optimization and caching.
- Optimized MySQL queries improving database performance by 35% (200ms → 130ms); deployed on AWS EC2 with auto-scaling handling 5x traffic spikes.
- Created interactive Power BI dashboards, enabling data-driven insights that improved decision-making efficiency by 25%.

PROJECTS

CropSense | Repo | Python, Flask, ML, Scikit-learn

- Developed AI crop recommendation system with 92% prediction accuracy; interactive dashboard reduced manual decision time by 60%.

Bank Transaction Backend | Repo | FastAPI, Python, SQLAlchemy, JWT

- Built banking system processing 5,000+ transactions with 99.9% reliability; implemented JWT auth & RBAC with zero unauthorized access; provided interactive API docs reducing onboarding by 50%.

Personal Portfolio | Repo | Live | React, TypeScript, Tailwind CSS, Vite

- Developed responsive portfolio with 95+ Lighthouse score and sub-2s load time; modern UI with animations, contact form, and filterable gallery increasing engagement by 40%.

CERTIFICATIONS

- IBM** - Artificial Intelligence Fundamentals (Issued Jun 2026)
- Forage** - Deloitte Australia Data Analytics Job Simulation (Issued Jun 2026)
- AWS Training & Certification** - Foundations of Prompt Engineering (Issued May 2026)
- Cognitive Class** - SQL and Relational Databases 101 (Issued Jun 2026)

ACHIEVEMENTS

- Architected 3+ production-ready applications with Django and FastAPI during internship, serving 1,000+ users.
- Successfully deployed applications on AWS EC2 with auto-scaling, handling 5x traffic spikes with zero downtime.
- Built an AI-powered crop recommendation system achieving 92% prediction accuracy using Scikit-learn.
- Active contributor to open-source projects with 4+ repositories and 50+ GitHub contributions.
